

Play the game Guess the Chemical Elements.

When you correctly name an element in the game, the chatbot will tell you:

- 1) Two properties of an element.
- 2) Two possible uses of the element.
- 3) Two pieces of information about the element from the periodic table.

Write these pieces of information down in a table and verify them using other sources.

Element Name:					
Properties	Verification/ Correction	Uses	Verification/ Correction	Information from the Periodic Table	Verification/ Correction

Element Name:					
Properties	Verification/ Correction	Uses	Verification/ Correction	Information from the Periodic Table	Verification/ Correction
